

Timestamp	Do you think personal information is relevant in my portfolio?	What colors do you think work best for a portfolio?	Would you like to have to read detailed long text in paragraphs or a list with a short relevant description for the learning outcomes?	What opinion do you have about having to log in into my portfolio to access it?	Would you like to have a comment section where you can comment on my text about the learning outcomes?	Would you agree for every learning outcome to have a separate page?	Do you prefer a portfolio wit a lot of visual representation or very little visuals?	Would you prefer the main learning outcome information to be on the website itself or in an accessible PDF document?
